

Our New, "GentleMax Pro™" & Laser Hair Membership

The Pro Advantage: Faster, More Comfortable With the Best Results Possible

Introducing the all new "GentleMax Pro™".

The GentleMax Pro™ is an integrated aesthetic laser platform offering more power and versatility than any other multi-wavelength device. The GentleMax Pro™ is a dual wavelength laser platform that combines a fast and powerful 755nm alexandrite laser for lighter skin types and an equally powerful 1064 nm ND:YAG laser for darker skin types. The GentleMax Pro™ treats all skin types with gentle, effective and safe hair removal and is vastly superior to the old GentleMax systems.

Superior Epidermal Protection

One of the principal reasons we selected the GentleMax Pro™ is because only this system uses a patented technology called Dynamic Cooling Device™ (DCD™) that utilizes bursts of cryogen (a cooling spray) before and after the laser pulse. This unique system offers both unparalleled epidermal protection and is the most pain free laser for laser hair removal we've ever experienced.

GentleMax Pro™ has raised the bar

in performance, design and reliability. Having the two best lasers for hair removal in a single machine has revolutionized Skin Procedures. On average most patients will now only need 4-6 treatments to achieve maximum hair reduction.
